

Git...

1. `cd ./TrainingBatch02Q42022/` ( just to go to training folder which they assigned)

2. `cd ./indira1/` (to go to specific folder where we will be adding documents)

3. `pwd`

after adding or copy paste the documents in indira 1 use git add command

4. `git status` ( it will show the status of files ) - not mandatory

5. `git add *` ( to add the files)

6. `git status` - not mandatory

7. `git commit *` (here after using the above command use insert and add comment for example "adding details" and use `esc` and type `-wq` )

8. `git pull`

9. `git push` (after using this command will be able to see ur code in website)

`C:\Users\nares\documents\workspace\TrainingBatch02Q42022\indira1> cd ../`

`C:\Users\nares\documents\workspace\TrainingBatch02Q42022>`
